<input checked="" type="checkbox"/>	Challenge/Response			
<input type="checkbox"/>	Signature			
Summary				
<p>Novell NMAS is a suited way to offer multiple authentication methods throughout your network. In combination with Ichain, Access Manager, which represents reverse proxying and providing Proxy and VPN services, you can setup a mix of authentication procedures. Novell NMAS has the Vasco authentication mechanism integrated. This allows users to log on with a One Time password, generated by the Digipass, to an Ichain, BorderManger, Access Manager portal, a VPN session, and Win32 Novell client. Vasco provides a Plug-In which extends the NMAS . With Console One or iManager the Novell administrator manages users and Digipass at once.</p>				
Supported partner products				
<ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Novell NMAS – versions 2.0,2.1,2.2,2.3, 3.1, 3.2,3.3</li> <li><input checked="" type="checkbox"/> NMAS Client – versions 2.2,2.3,2.7</li> <li><input checked="" type="checkbox"/> Novell Client 32 – all versions</li> <li><input checked="" type="checkbox"/> Novell iChain – versions 2.0, 2.1, 2.2,2.3</li> <li><input checked="" type="checkbox"/> Novell BorderManager – versions 3.7, 3.8</li> <li><input checked="" type="checkbox"/> Novell Access Manager – all versions</li> <li><input checked="" type="checkbox"/> Novell iManager – versions 2.6, 2.7</li> <li><input checked="" type="checkbox"/> Novell Open Enterprise Server – all versions</li> </ul>				
Required VASCO products				
<ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Vasco Method for NMAS</li> <li><input checked="" type="checkbox"/> DIGIPASS GO3, GO6, GO7, DP300, DP260, DP270, DP855eID certificate, DP Mobile</li> </ul>				
Features				
<ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> No Additional Servers Required</li> <li><input checked="" type="checkbox"/> Central Management with <b>Console One</b> or <b>iManager</b> maintaining your Digipass information stored in eDirectory.</li> <li><input checked="" type="checkbox"/> Advanced Digipass Bulk Management (Assign multiple Digipass at once, Manage PIN, Restore features...)</li> </ul>				
Additional information				
<ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> <a href="http://www.vasco.com/novell">www.vasco.com/novell</a> , www.labs.vasco.com</li> <li><input checked="" type="checkbox"/> Instructions for Ichain and NMAS</li> <li><input checked="" type="checkbox"/> White Paper: Digipass Strong User Authentication with Novell NMAS and ICHAIN</li> <li><input checked="" type="checkbox"/> Product documentation</li> </ul>				
Remarks				
<p>* Digipass Go Series and PIN pad series support 2-factor authentication by requiring the user to add a static PIN to the One Time Password. This PIN is entered in the same field as the One Time Password.</p> <p>Note: Vasco also offers the Vacman Radius Middleware , Identikey Server with Idap support, and Identifier (appliance) with Idap support. This is Vasco's Authentication server solution. Vacman Radius Middleware can be an option when there is need for Radius and Web (OWA/Citrix portals...) authentication in Mixed OS environments. Identikey can suite well for Radius and SOAP support.</p>
